

TITAN 25/4500 Options

1 CP/ 2500 :

Pneumatic foot lift & tension releaser : allows for quicker & easier handling of carpets, requires air pressure between 4 to 6 bar.

2 NEW CP/2500 DAC

Adjustable pneumatic foot lift & tension releaser : same function as CP/2500 + additionally allows to adjust pressure of the feeddog for fast and simple adjustment of machine to different carpet thicknesses.

3 2600CV PULLER

Extremely strong pneumatic puller system which is fully synchronised with the internal parts of DK 2500 overedger. Strongly advised for handling large carpets.

3 2600DAC PULLER

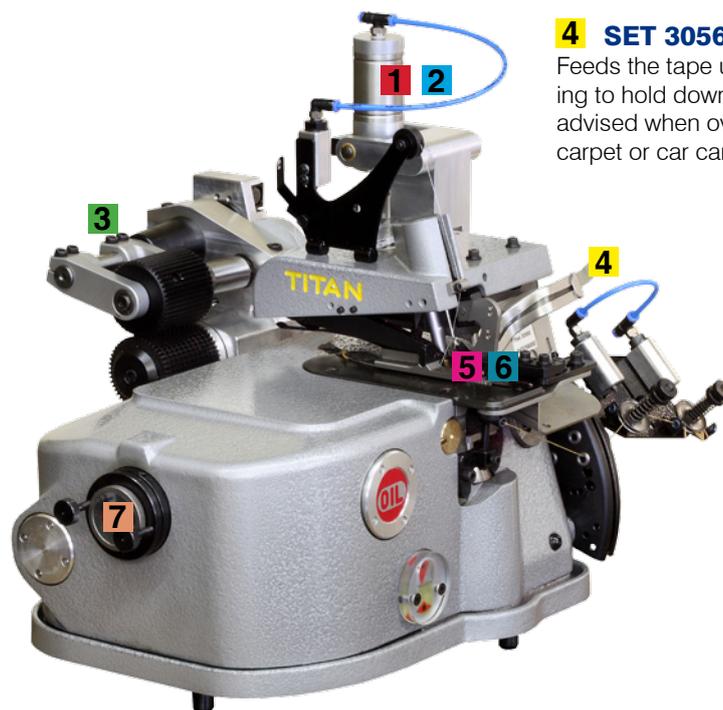

NEW : same functions as DK2600cv + additional pneumatic adjustment of the pressure on the puller for improved results on different carpet qualities.

3 2650 DAC PULLER 2600S DAC PULLER

NEW : completely new design **extra long puller**, useful for high pile carpets such as shaggy. Left-hand version available.

4 SET 30566 TAPE GUIDE

Feeds the tape under the overedging to hold down the pile. Strongly advised when overedging high pile carpet or car carpets with grooves.

5 DCD/2500 CUTTING DEVICE

These knives are cutting excess pile or carpet just before sewing.

6 NEW UKM/2500

Upper knife movement
Allows to cut extra heavy or thick carpets.
Left hand version available.
Available in two sizes.

7 RPE/2500 External stitch density adjuster

Allows to change the density of stitches while sewing. This permits the operator to obtain the best covering effect in a short time. Strongly advised when using different qualities of thread and carpet.

NCV/ 2500

Needle cooling device. Advised when using very heavy carpet or hard backings. Avoids thread breaking and needle breaking.

CCA/ 2500

External chain cutting device.

TS/ 2500

Upper transport
